

EDUCATE. ADVOCATE. CONNECT.

The Florida Economic Development Council supports the Florida 2030 Blueprint to Secure Florida's Future. In May 2019, the Board of Directors of FEDC adopted the following Florida 2030 Blueprint Goals as our own:

- Top state for GDP; Top quartile for most diversified state economy
- Doubling the rural share of Florida's GDP
- Inclusion of Florida 2030 goals (all 39) in regional economic development strategies

Over the last year an FEDC task force has worked with The Florida Chamber Foundation and our own state, regional and local economic development, community development and talent development partners to develop a "strategic doing" action plan to advance these goals:

Led by Rose Fagler, Weyerhaeuser, and Doug Wheeler, Florida Ports Council, this task force is focused on developing metrics and measurements of progress to advance these goals. We're using the Florida 2030 blueprint as our compass and using the Florida Scorecard as our measurement.

[*View the video here](#) to learn more about what our task force has learned and what more needs to be done to secure Florida's economic future.

This task force has a lot to accomplish. We invite you to join us and bring your passion and talents to this team.

To get involved with this task force, email [Jill Blackman](#)

***Please note: as of October 2020, Florida is now the 16th most diversified state economy and improving!**
